01 What you will learn

- Combine all previous skills for advanced pentesting scenarios
- Full-scope penetration testing, including bug chaining
- Complex real-world attack simulations
- Advanced exploitation, post-exploitation and reporting
- Preparation for high-level red team operations
- Red team prep: adversary emulation, opsec-safe persistence techniques (lab only) and coordinated exercises
- Capstone: a timed full-scope engagement in an isolated environment, ending in a graded report and live demo — pass required for certification

02 Course Curriculum

The detailed module-wise curriculum is shared with students at the start of the batch. Contact us for the latest module plan.
